ICD-10-CM Coding for Pulmonary Medicine

Course Description: ICD-10 will contain many more challenges than ICD-9. October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We’d like to help you ensure that your coding and documentation is ready for the upcoming changes. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for Pulmonary Medicine.

What You Will Learn: In this two hour webinar, the focus of instruction will be diagnosis coding for Pulmonary Medicine. We will cover some of the most common diagnoses reported by this specialty, such as Asthma, Bronchitis, Pneumonia and more.

Objectives

- Understand the format and structure of ICD-10
- Understand the general guidelines in ICD-10
- Understand coding guidelines specific to Pulmonary Medicine
- Review “use additional code” notes for Exposure to Tobacco, History of Tobacco Use, etc.
- Understand the use and misuse of unspecified diagnosis codes
- Review NOS and NEC meanings
- Review the conventions in ICD-10, including the new Excludes1 and Excludes2 notes

Who Should Attend: Coders, billers, auditors, managers and supervisors, HIM staff and directors, physicians, non-physician practitioners and all others who may use diagnoses in their day-to-day activities.

Cost: $79.00
ICD-10-CM Coding for Neurology and Neurosurgery

Course Description
ICD-10 will contain many more challenges than ICD-9. October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We’d like to help you ensure that your coding and documentation is ready for the upcoming changes. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for Neurology and Neurosurgery Coding. This session will cover a review of the ICD-10 codes and new descriptions that are commonly reported in Neurology and Neurosurgery such as Alzheimer’s, Epilepsy and Migraine.

What you will learn
This session will cover updated terminology for epilepsy. The dominant/Non-dominate coding guidelines as well as sequencing of pain codes. This session will also review “use additional code” as well as early and late onset of Alzheimer’s.

Objectives
- Understand the format and structure of ICD-10
- Understand the general guidelines in ICD-10
- Understand coding guidelines specific for Neurology and Neurosurgery conditions
- Understand the use of placeholders
- Understand the use and misuse of unspecified diagnosis codes
- Review conventions in ICD-10 including “excludes” notes

Who Should Attend: Coders, billers, auditors, managers and supervisors, HIM staff and directors, physicians, non-physician practitioners and all others who may use diagnoses in their day-to-day activities.

Cost: $79.00
Tuesday, June 24, 2014

ICD-10-CM Coding for ENT/Allergy

Course Description: October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We’d like to help you ensure that you documentation is ready for the upcoming changes.

What You Will Learn: In this two hour webinar, the focus of instruction will be diagnosis coding for ENT and Allergy. We will cover some of the most common diagnoses reported by this specialty.

Objectives

- Navigating the index
- Format changes and structural differences in ICD-10
- Convention and Guideline review
- Documentation guidelines
- ENT Terminology and common conditions used in this specialty
- Signs and symptoms usage

Who Should Attend: Coders, billers, auditors, managers and supervisors, HIM staff and directors, physicians, non-physician practitioners and all others who may use diagnoses in their day-to-day activities.

Cost: $79.00
ICD-10-CM Coding for General Surgery

Course Description
ICD-10 will contain many more challenges than ICD-9. October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We'd like to help you ensure that your coding and documentation is ready for the upcoming changes. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for General Surgery. This session will cover a review of the ICD-10 codes and new descriptions that are commonly reported in General Surgery such as these inflammatory diseases; Ulcerative Colitis, Crohn’s Disease and Diverticular.

What you will learn
This session will cover the use of “combination” codes as well as the “use additional code” guidelines. There will be a review on how to code for manifestation as well as laterality for diseased organs that are part of a pair. This session will also review coding for the highest specificity for inflammatory disease complications.

Objectives
- Understand the format and structure of ICD-10
- Understand the general guidelines in ICD-10
- Understand coding guidelines specific for Diseases of the Digestive System
- Understand the use of placeholders
- Understand the use and misuse of unspecified diagnosis codes
- Review conventions in ICD-10 including “excludes” notes

Who Should Attend: Coders, billers, auditors, managers and supervisors, HIM staff and directors, physicians, non-physician practitioners and all others who may use diagnoses in their day-to-day activities.

Cost: $79.00
ICD-10-CM Coding for Behavioral Health

Course Description
ICD-10 will contain many more challenges than ICD-9. October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We'd like to help you ensure that your coding and documentation is ready for the upcoming changes. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for behavioral and mental health coding. This session will cover a review of the ICD-10 codes and new descriptions that are commonly reported in behavioral health such as these alcohol abuse and use, major depressive disorder, bipolar disorder and more.

What you will learn
In this two hour webinar, the focus of instruction will be diagnosis coding for behavioral and mental health. We will cover some of the most common diagnoses reported by this specialty.

Objectives
- Understand the format and structure of ICD-10
- Understand the general guidelines and coding guidelines for behavioral health.
- Understand coding guidelines specific for Diseases treated in behavioral health
- Understand the use and misuse of unspecified diagnosis codes
- Review conventions in ICD-10 including “excludes” notes

Who Should Attend: Coders, billers, auditors, managers and supervisors, HIM staff and directors, physicians, non-physician practitioners and all others who may use diagnoses in their day-to-day activities.

Cost: $79.00
Tuesday August 5, 2014

ICD-10-CM Coding for Oncology and Radiation Oncology

Course Description: ICD-10 will contain many more challenges than ICD-9 October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We’d like to help you ensure that your coding and documentation is ready for the upcoming changes. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for Oncology and Radiation Oncology. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for Oncology and Radiation Oncology.

What You Will Learn: In this two hour webinar, the focus of instruction will be diagnosis coding for Oncology and Radiation Oncology. We will cover some of the most common diagnoses reported by this specialty, such as neoplasms, chemotherapy, immunotherapy, radiation therapy, and more.

Objectives

- Understand the format and structure of ICD-10
- Understand the general guidelines in ICD-10
- Understand coding guidelines specific to Neoplasms
- Understand “laterality” when coding for certain neoplasms
- Understand the use and misuse of unspecified diagnosis codes
- Review NOS and NEC meanings
- Review the conventions in ICD-10, including the new Excludes1 and Excludes2 notes

Who Should Attend: Coders, billers, auditors, managers and supervisors, HIM staff and directors, physicians, non-physician practitioners and all others who may use diagnoses in their day-to-day activities.

Cost $79.00
Tuesday August 19, 2014

ICD-10 CM for Family Practice and Primary Care

ICD-10 will contain many more challenges than ICD-9. October 1, 2014 is quickly approaching, which means ICD-10-CM will finally be here. We'd like to help you ensure that your coding and documentation is ready for the upcoming changes. This webinar is going to lay the foundation for a solid understanding of the ICD-10 coding structure for coding Primary Care.

This session will cover a review of ICD-10 codes, new descriptions, and combination codes. This session will also include examples of ICD-10 codes that are commonly reported.

What you will learn:

- Key changes for Diabetes Mellitus (e.g. use of insulin code required)
- Key changes for Hypertension (e.g. ICD-10 only requires one code)
- ICD-10 coding for common conditions treated in primary care
- Acute and chronic conditions
- Signs and symptoms
- Use additional code

Objectives

- Understand format and structure
- Understand the coding guidelines specific to Primary Care
- Review the difference between NEC and NOS codes
- Discuss the use and misuse of unspecified codes
- Review conventions in ICD-10, including excludes notes

Who Should Attend:

Physicians, Billers, Coders, Auditors, Managers, Supervisors, HIM staff, Non-Physician Extenders, and All others who may use diagnoses in their day to day activities.

Cost: $79.00
